

Quick Start Guide

Boundary Microphone

- 1 Connect microphone to camcorder, mixer, or other audio input
- 2 Place microphone on a flat surface (see placement suggestions below)
- 3 Power on audio recording/monitoring device (microphone is already powered by internal AAA battery)

Suggestions for Use

Conferences, group discussions, seated interviews

Lay the microphone on the table. Use one microphone in the middle of every 4 to 6 people. Ideally, no person should be more than 3 feet from the nearest microphone. For maximum clarity, hold the conference in an acoustically “dead” room with carpeting, acoustic-tile ceiling, and drapes.

Lectures

Place the microphone on top of the lectern, near the edge of the lectern farthest from the person speaking.

Videos or movies

Lay the microphone on a table or on the floor near the action.

Music

Place the microphone near the sound source, on the floor, on a wall, or on a large hard-surfaced panel. For grand piano, tape the microphone to the center of the underside of the raised lid.

Replacing the Battery

- 4 If the internal microphone battery stops working, please follow the directions at right to replace it
